

NovaTech Solutions — Company Overview

Company Profile

NovaTech Solutions is a fictional technology company created for the DocMind RAG project. The company provides software development, cloud integration, data engineering, and technical consulting services.

Mission

NovaTech Solutions aims to help organizations build reliable, maintainable, and secure software systems through practical engineering and responsible use of technology.

Departments

The company is organized into Engineering, Product, Customer Success, Human Resources, Finance, and Operations departments.

Working Model

NovaTech uses a hybrid working model. Teams may work remotely or from designated company offices according to their role and manager-approved schedule.
