

NovaTech Product A — NovaDesk

Overview

NovaDesk is a fictional customer-support management platform. It allows support teams to manage customer requests, assign tickets, track statuses, and monitor service performance.

Key Features

NovaDesk includes ticket management, team assignment, priority levels, customer profiles, dashboards, search, and configurable notification rules.

User Roles

NovaDesk provides Administrator, Manager, Agent, and Viewer roles. Administrators configure the system, while Agents primarily work on assigned customer tickets.

Default Ticket Priorities

Tickets can be classified as Low, Medium, High, or Critical. Critical tickets represent severe production issues requiring immediate attention.
